KM-01 FOLDING THERMAL VERSION

The KM01-FT drone is a 15-inch foldable device that can be carried by one person and deployed in less than a minute, making it a powerful tool on the battlefield for small units. It is intended to be able to carry loads of up to 5kg at high speed and in any conditions. Its reinforced structure and its dust, fog and rain resistant components, together with its dual camera that incorporates a thermal camera allow it to fly in any situation.
